

**HILLTOP AT HIGH BRIDGE
HOMEOWNER'S ASSOCIATION, INC.**

DRYER VENT CLEANING AFFIDAVIT

(May only be used for units that have dryers in the basement or entry level)

UNIT OWNER(S) _____

UNIT ADDRESS _____

I (we) are aware of the Association requirements for the unit's dryer vent to be inspected and, if necessary, cleaned by October 1, 2006 and every three years thereafter by a qualified professional, UNLESS the unit owner chooses to certify that a) the dryer is located and used in the basement or entry level with a short vent running to an exterior exhaust, and b) he/she has performed the inspection and/or cleaning themselves. I (we) also understand that in the event of a fire in the home that is deemed to have been caused by the neglect of proper maintenance to these items, I (we) are putting ourselves in a liable position in the case of subsequent damage or injury to the attached home(s) or residents.

Accordingly, as the owner(s) of the unit listed above, I (we) certify that the dryer is located in the basement or entry level, and that I (we) have inspected and/or cleaned the dryer vent in this unit, and deemed it in a safe condition. Therefore the dryer vent inspection and/or cleaning by a qualified professional is not required.
